REMARKS

Applicant would like to thank the Examiner for the careful consideration given the present application. The application has been carefully reviewed in light of the Office action and is amended as necessary to more clearly and particularly describe the subject matter which applicant regards as the invention.

In this amendment, applicant has amended the specification and has amended claims 1-6. The specification is amended in light of the Office action requesting that headings be inserted and spelling errors be corrected. The claims are amended to correct spelling errors and to provide proper antecedent basis for the limitations cited on pages 4-5 of the Office action. Claim 1 is also amended to include the limitation of an "essentially plane surface." Claim 2 is amended now to be an independent claim.

Applicant has also included an Information Disclosure Statement with the references EP 1006255 and NL 8400103. Both of these references are now included despite the fact that the Examiner initialed at least the EP 1006255 reference on May 8, 2007. The relevancy of these documents is presented within the international search report, a copy of which is also attached to this amendment, which states that these references fell into category "A" and thus are documents "defining the general state of the art which is not considered to be of particular relevance." This IDS complies with 37 CFR 1.97 (c)(2) as we are requesting that the fee under 37 CFR 1.17 (p) be charged to our Deposit Account No. 16-0820.

In light of the foregoing, it is respectfully submitted that the present application is in a condition for allowance and notice to that effect is hereby requested. If it is determined that the application is not in a condition for allowance, the Examiner is invited to initiate a telephone interview with the undersigned attorney to expedite prosecution of the present application.
